ABOUT

I'm a front-end engineer comfortable working in a full-stack capacity, with a passion for crafting polished user interfaces. With 7+ years of experience, I've shipped features end-to-end and have recently been diving into creative development and design engineering to further expand my skill set.

EXPERIENCE

<u>Restream</u> - *Live multistreaming platform - Senior Frontend Engineer* - 2024 – Present
- Technologies: **React**, **TypeScript**, **Tailwind**
- Building and maintaining Restream's <u>Upload & Stream</u> application

<u>Cast AI</u> - *K8s automation platform - Senior Frontend Engineer* - 2024 – 2024
- Technologies: **React**, **TypeScript**, **Kubernetes**
- Building and maintaining Cast AI's K8s automation dashboard
- Shipped the <u>AI Enabler</u> playground MVP for LLM comparison and benchmarking

<u>The Vendry/Groupize</u> - *B2B event marketplace - Full-Stack Software Engineer* - 2021 – 2024
- Technologies: **React**, **Next.js**, **Tailwind**, **TypeScript**, **MySQL**, **Node.js**, **Figma**
- **First engineer** at a B2B venue marketplace startup that raised $7.8M+ from top investors like Primary Ventures and Founder Collective, reaching 200K+ Monthly Active Users before being acquired
- Developed key B2B SaaS features like Team Knowledge Base, used by 300+ enterprises
- Built internal and external Chrome extensions, complete with a CI/CD pipeline and E2E testing
- Introduced ESLint, Prettier and UI tests which improved code quality and maintainability and built a comprehensive UI components library which improved visual consistency and accessibility
- Supported integration of The Vendry & Groupize post-acquisition

<u>Infinum</u> - *Software Agency - JavaScript Engineer* - 2019 – 2021
- Technologies: **React**, **Next.js**, **TypeScript**, **Angular**, **RxJS**, **D3.js**
- Built complex dashboards and custom charts using D3.js for <u>Signify's</u> Interact Hospitality product
- Maintained <u>Signify's</u> Interact Retail suite of apps built using Angular 10-12 and web-based internal CAD tools built with React and HTML5 Canvas

<u>Clover Studio</u> - *Software Agency - Web Developer* - 2017 – 2019
- Technologies: **React**, **Redux**, **Next.js**, **Node.js**, **MySQL**
- Led the UI migration of the company's main product, a chat app, from Backbone.js to React, leading to a better UX and new feature additions

EDUCATION

University of Zagreb - *Master's Degree in Informatics*
